About Us

Custom Metal Solutions Shaped by Expertise

Samtaş started its operations in 1992 with the production of cold sheet cutting, forming, and mold manufacturing, establishing its expertise, particularly in sheet metal production for the automotive industry. With a quality-focused approach, the company continuously improved its capabilities and, in 2007, combined its 15 years of experience in the seating industry with mold manufacturing, transitioning into a strong partnership structure. This step enabled Samtaş to offer innovative solutions in metal spare parts production, securing a significant position in the industry.

Today, exporting 85% of its production to Europe, Samtaş specializes in manufacturing metal spare parts for entertainment and social venues, maintaining a customer-oriented production approach. The company produces high-quality components for casinos, bars, cafes, restaurants, cinema, conference hall and stadiums, working closely with customers to develop joint designs and serve as a reliable solution partner. Operating in a 3,000 m² closed production facility in Bursa, Samtaş continues to stand out in the industry with its innovative design support and high-quality manufacturing.

Our Policies

We Move Forward with Confidence, Guided by Our Values.

Samtaş creates a difference in the industry by providing high-quality production and innovative solutions with a customer-focused approach and ethical working principles. It operates with respect for continuous development, teamwork, and the environment.

Our Vision

To be a leading company preferred in Türkiye and globally, through the metal spare part production and services we provide in the retail sector.

Our Mission

With our team, which adopts a customer-focused approach and is committed to our company values, we aim to provide high-quality, reliable, and solution-oriented services that exceed expectations.

Our Values

We foster an ethical and reliable work environment, prioritizing respect for nature, the environment, and humanity. Success, development, teamwork, and honest communication are key to us.

Comprehensive Manufacturing Solutions

Samtaş, as a company specialized in high-quality production and engineering services, offers a wide range of expertise in key areas such as CNC Tube Bending, Sheet Metal Forming, Welding, Molding, and Polishing.
